

**Battery Park  
City Authority**

# **Battery Park City Resiliency**

**October 29, 2021**

## Battery Park City Authority

- BPCAs first-ever Strategic Plan identifies a set of key priorities for Battery Park City.
- Among these is to create a safe and climate resilient place with:
  - ✓ a built environment and natural systems that adapt to the changing climate
  - ✓ an implementable strategy to achieve carbon neutrality
  - ✓ robust infrastructure to support daily life and prepare for future weather events

## Battery Park City Authority

- Since Superstorm Sandy BPCAs has initiated and advanced design & construction work on a suite of resiliency infrastructure projects intended to protect Battery Park City from the threats of future storm surge & sea level rise
- Three interrelated resiliency infrastructure initiatives are now underway to create an integrated coastal flood risk management system, which will incorporate approximate design flood elevations ranging from 15 to 21 feet:
  - ✓ The BPC Ball Fields & Community Center Resiliency Project
  - ✓ The South Battery Park City Resiliency Project
  - ✓ The North/West BPC Resiliency Project

## Battery Park City Authority

- **DEIS in progress**
  - **Public Scoping:** October 13, 2021
- **Construction Start:** Mid-2022
  - **95% design Pier A Plaza & Battery**
  - **95% design Wagner Park & MJH**
- **Final PDC Approval:** Winter 2021-2022
